INDEPENDENT AUDITORS' REPORT

Board of Directors
South Burlington School District
South Burlington, Vermont

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, business-type activities, each major fund and the aggregate remaining fund information of the South Burlington School District, as of and for the year ended June 30, 2020 and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, business-type activities, each major fund and the aggregate remaining fund information of the South Burlington School District as of June 30, 2020 and the respective changes in financial position and where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison information and pension and OPEB information on pages 4 through 12 and 74 through 82 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the South Burlington School District's basic financial statements. The Budgetary Comparison Schedule - Budgetary Basis - Budget and Actual - General Fund Revenues, Schedule of Departmental Operations - General Fund, combining and individual nonmajor fund financial statements and general capital asset schedules are presented for purposes of additional analysis and are not a required part of the basic financial statements. The schedule of expenditures of federal awards is presented for purposes of additional analysis as required by Title 2 U.S. *Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards* and is also not a required part of the basic financial statements.

The Budgetary Comparison Schedule - Budgetary Basis - Budget and Actual - General Fund Revenues, Schedule of Departmental Operations - General Fund, combining and individual nonmajor fund financial statements, general capital asset schedules and the schedule of expenditures of federal awards are the responsibility of management and were derived from and related directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Budgetary Comparison Schedule - Budgetary Basis - Budget and Actual - General Fund Revenues, Schedule of Departmental Operations - General Fund, combining and individual nonmajor fund financial statements, general capital asset schedules and the schedule of expenditures of federal awards are fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated May 27, 2021, on our consideration of the South Burlington School District's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the South Burlington School District's internal control over financial reporting and compliance.

**REQUIRED SUPPLEMENTARY INFORMATION
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2020**

(UNAUDITED)

The following management's discussion and analysis of South Burlington School District's financial performance provides an overview of the District's financial activities for the fiscal year ended June 30, 2020. Please read it in conjunction with the District's financial statements.

Financial Statement Overview

The South Burlington School District's basic financial statements include the following components: 1) government-wide financial statements, 2) fund financial statements and 3) notes to the financial statements. This report also includes required supplementary information which consists of the general fund budgetary comparison schedule, pension and OPEB schedules and other supplementary information which includes combining and other schedules.

Basic Financial Statements

The basic financial statements include financial information in two differing views: the government-wide financial statements and the fund financial statements. These basic financial statements also include the notes to financial statements that explain in more detail certain information in the financial statements and also provide the user with the accounting policies used in the preparation of the financial statements.

Government-Wide Financial Statements

The government-wide financial statements provide a broad view of the District's operations in a manner that is similar to private businesses. These statements provide both short-term as well as long-term information in regards to the District's financial position. These financial statements are prepared using the accrual basis of accounting. This measurement focus takes into account all revenues and expenses associated with the fiscal year regardless of when cash is received or paid. The government-wide financial statements include the following two statements:

The Statement of Net Position - this statement presents *all* of the government's assets, deferred outflows of resources, liabilities and deferred inflows of resources with the difference being reported as net position.

The Statement of Activities - this statement presents information that shows how the government's net position changed during the period. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of the related cash flows.

Both of the above-mentioned financial statements have separate columns for the two different types of District activities. The types of activities presented for the South Burlington School District are:

- *Governmental activities* - The activities in this section are mostly supported by taxes and intergovernmental revenues (federal and state grants). Most of the District's basic services are reported in governmental activities, which regular instruction, support services, transportation, administration, operations and maintenance, vocational education, other support services, special education and program expenditures.
- *Business-type activities* - These activities are normally intended to recover all or a significant portion of their costs through user fees and/or charges to external users for goods and/or services. These activities for South Burlington School District include the School Nutrition Fund, School's Out Program, Munson Field and other nonmajor funds.

Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. South Burlington School District, like other local governments, uses fund accounting to ensure and demonstrate compliance with financial related legal requirements. All of the funds of South Burlington School District can be divided into three categories: governmental funds, proprietary funds and fiduciary funds.

Governmental funds: Most of the basic services provided by the District are financed through governmental funds. Governmental funds are used to account for essentially the same functions reported in governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the governmental fund financial statements focus on near-term inflows and outflows of spendable resources. They also focus on the balance of spendable resources available at the end of the fiscal year. Such information will be useful in evaluating the government's near-term financing requirements. This approach is known as the current financial resources measurement focus and the modified accrual basis of accounting. Under this approach revenues are recorded when cash is received or when susceptible to accrual. Expenditures are recorded when liabilities are incurred and due. These statements provide a detailed short-term view of the District's finances to assist in determining whether there will be adequate financial resources available to meet the current needs of the District.

Because the focus of governmental funds is narrower than that of government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the

governmental funds balance sheet and the governmental funds statement of revenues, expenditures and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. These reconciliations are presented on the page immediately following each governmental fund financial statement.

The South Burlington School District presents three columns in the governmental funds balance sheet and the governmental funds statement of revenues, expenditures and changes in fund balances. The District's major governmental funds are the General Fund and Capital Projects Fund. All other funds are shown as nonmajor and are combined in the "Other Governmental Funds" column on these statements.

The general fund is the only fund for which the District legally adopted a budget. The Budgetary Comparison Schedule - Budgetary Basis - Budget and Actual - General Fund provides a comparison of the original and final budget and the actual expenditures for the current year.

Proprietary Funds: The South Burlington School District maintains three major proprietary funds, the School Nutrition Fund, School's Out Program, Munson Field and two nonmajor funds. These funds are used to show activities that operate more like those of commercial enterprises. Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. Like the government-wide financial statements, proprietary fund financial statements use the accrual basis of accounting. No reconciliation is needed between the government-wide financial statements for business-type activities and the proprietary fund financial statements.

Fiduciary Funds: These funds are used to account for resources held for the benefit of parties outside South Burlington School District. These funds are not reflected in the government-wide financial statements because the resources of these funds are not available to support the District's own programs. The accounting used for fiduciary funds are much like that of proprietary funds. They use the accrual basis of accounting.

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the Government-Wide and the Fund Financial Statements. The Notes to Financial Statements can be found following the Statement of Changes in Net Position - Fiduciary Funds.

Required Supplementary Information

The basic financial statements are followed by a section of required supplementary information, which includes a Budgetary Comparison Schedule - Budgetary Basis - Budget and Actual - General Fund, a Schedule of Proportionate

Share of the Net Pension Liability - VSTRS Plan, a Schedule of Contributions - Pension - VSTRS Plan, a Schedule of Changes in Net Pension Liability and Related Ratios - District Retirement Income Plan, a Schedule of Contributions - District Retirement Income Plan, Schedule of Investment Returns - District Retirement Income Plan, a Schedule of Proportionate Share of the Net OPEB Liability, a Schedule of Contributions - OPEB and Notes to Required Supplementary Information.

Other Supplementary Information

Other supplementary information follows the required supplementary information. These combining and other schedules provide information in regards to nonmajor funds, capital asset activity and other detailed budgetary information for the general fund.

Government-Wide Financial Analysis

Our analysis below focuses on the net position and changes in net position of the District's governmental and business-type activities. The District's total governmental net position increased by \$1,087,189 from \$5,985,433 to \$7,072,622. The District's total business-type net position increased by \$179,881 from \$305,920 to \$485,801.

Unrestricted net position - the part of net position that can be used to finance day-to-day operations without constraints established by debt covenants, enabling legislation or other legal requirements - increased to a deficit balance of \$1,411,263 at the end of this year for the governmental activities. The District's unrestricted net position for the business-type activities increased to a balance of \$355,775 at the end of this year.

Revenues and Expenses

Revenues for the District's governmental activities increased by 10.16%, while expenses increased by 5.73%. Increases in operating grants and contributions and grants and contributions not restricted to specific purposes primarily accounted for the increase in revenues. Likewise, significant increases were incurred in several expense categories, including regular instruction, operations and maintenance, other support services, special education and state on-behalf payments offset by decreases in program expenses.

Revenues for the District's business-type activities increased by 10.54%, while expenses increased by 6.32%. Revenues increased primarily due to operating grants and contributions. Expenses increased primarily due to salaries and food.

Financial Analysis of the District's Fund Statements

Governmental funds: The financial reporting focus of the District's governmental funds is to provide information on near-term inflows, outflows and balances of spendable resources. Such information may be useful in assessing the District's financial requirements. In particular, unassigned fund balance may serve as a useful measure of a government's financial position at the end of the year and the net resources available for spending.

Total Nonmajor Funds	\$ 544,232	\$ 514,562	\$ 29,670

The changes in total fund balances for the general fund, capital projects fund and the nonmajor funds occurred due to the regular activity of operations.

Proprietary funds: The District's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

The proprietary funds had a total net position for the current year of \$485,801. This was an increase of \$179,881 from the net position of the prior year.

Budgetary Highlights

There was no difference between the original and final budget for the general fund.

The general fund actual revenues were receipted over budgeted amounts by \$608,707. This was due to all revenue categories being receipted over budgeted amounts with the exception of charges for services and transfers from other funds.

The general fund actual expenditures were expended under budgeted amounts by \$108,820. This was due to all expense categories being expended within or under budgeted amounts with the exception of regular instruction, administration, vocational education, other support services, special education and transfers to other funds.

Capital Asset and Debt Administration

Capital Assets

As of June 30, 2020, the net book value of capital assets recorded by the District increased by \$198,431. This is the result of capital additions of \$1,875,699 less current year net disposals of \$226,324 and depreciation expense of \$1,450,944.

Debt

At June 30, 2020, the District had \$4,673,800 in bonds and notes from direct borrowings outstanding versus \$5,640,936 last year. Refer to Note 7 of the Notes to Financial Statements for more information.

Currently Known Facts, Decisions or Conditions

Salaries and benefits account for more than 80% of the District's operating budget and these costs are largely the result of three district employee groups that are represented by labor unions. In November of 2019, the contract for the South Burlington School District Teachers Association was settled using the statewide health care criteria established per Act 11. However, the union support staff contract nor the administrators were not settled prior to June 30, 2020.

In October of 2020, the FAA approved funding for the Gertrude Chamberlin Elementary School's positive ventilation system as part of the Burlington International Airport noise mitigation due to the results of the FAA's Acoustical Testing Plan. The \$3M positive ventilation system project is planned to be completed by summer 2021.

The outbreak of COVID-19 has been declared a pandemic and led to a national state of emergency in the United States. Refer to Note 1 of Notes to Financial Statements for more detailed information.

At present it is not possible, with any degree of certainty, to estimate the impact of COVID-19 on the revenues, expenditures, budget or overall financial position of the School District. No assurance can be given regarding future events or impacts because these actions and events are unpredictable or unknowable at this time and are outside the control of the School District.

Economic Factors and Next Year's Budgets and Rates

The Vermont Education Health Initiative (VEHI) who handles the healthcare for the majority of the schools in Vermont announced an increase in the premiums on the new health care plans for the 2021 Fiscal Year of 12.9%. This increase was largely due to the unknown factors of utilization and out-of-pocket coverage by Districts across the state. Since the plans were new starting in 2019, there was no history to base the 2020-2021 rate structure on.

Contacting the District's Financial Management

This financial report is designed to provide our citizens, taxpayers, customers and investors and creditors with a general overview of the District's finances and to show the District's accountability for the money it receives. RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND
CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS
TO THE STATEMENT OF ACTIVITIES
FOR THE YEAR ENDED JUNE 30, 2020

Net change in fund balances - total governmental funds (Statement E)	<u>\$ 230,361</u>
Amounts reported for governmental activities in the Statement of Activities (Statement B) are different because:	
Governmental funds report capital outlays as expenditures while governmental activities report depreciation expense allocated to those expenditures over the life of the assets:	
Capital asset acquisitions	1,875,699
Capital asset disposals	(226,324)
Depreciation expense	<u>(1,439,863)</u>
	<u>209,512</u>
Deferred outflows of resources are a consumption of net position by the government that are applicable to a future reporting period and therefore are not reported in the funds.	
	<u>883,058</u>
Repayment of long-term debt principal is an expenditure in the governmental funds, but the repayment reduces long-term obligations in the Statement of Net Position	
	<u>967,136</u>
Deferred inflows of resources are an acquisition of net position by the government that are applicable to a future reporting period and therefore are not reported in the funds.	
	<u>240,629</u>
Some expenses reported in the Statement of Activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds:	
Accrued compensated absences	(16,870)
Net pension liability	<u>(1,426,637)</u>
	<u>(1,443,507)</u>
Change in net position of governmental activities (Statement B)	<u><u>\$ 1,087,189</u></u>

SOUTH BURLINGTON SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2020

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity

The South Burlington School District was incorporated under the laws of the State of Vermont. The District provides the following services: regular instruction, support services, transportation, administration, operations and maintenance, vocational education, other support services, special education and program expenditures.

The District's financial statements are prepared in accordance with generally accepted accounting principles (GAAP). The Governmental Accounting Standards Board (GASB) is responsible for establishing GAAP for state and local governments through its pronouncements (Statements and Interpretations).

The District's combined financial statements include all accounts and all operations of the District. We have determined that the District has no component units as described in GASB Statement No. 14 and amended by GASB Statements No. 39 and No. 61.

COVID-19 Outbreak

The outbreak of COVID-19, a respiratory disease caused by a new strain of coronavirus, has been declared a pandemic by the World Health Organization and led to a national state of emergency in the United States. The State of Vermont, along with other state and local governments, declared states of emergency and issued multiple public health emergency orders that severely restrict movement and limit businesses and activities to essential functions. These actions and effects of COVID-19 have disrupted economic activity at all levels and impacted the processes and procedures for almost all businesses, including municipal and quasi-municipal entities.

In response to the health crisis created by COVID-19 since early March, the Governor of Vermont issued multiple executive orders and declarations to protect the public health in an effort to reduce community spread of the virus and protect citizens. These measures have included, among others, closing or restricting access to certain business and activities, issuing a "stay at home" directive for most citizens, restricting nonessential travel and limiting movement of all persons in Vermont to those necessary to obtain or provide essential services or activities. See Executive Order 01-20 and its addendums. As of the date of this report, the state of emergency was extended to June 15, 2021 and may be further extended if circumstances warrant. While steps toward reopening the State have begun, the speed and scope of the reopening process will depend upon progress toward limiting the continued spread of the disease.

Impact on and Results of Operations

On March 13, 2020, the Governor of Vermont directed the dismissal of Pre-K through 12 schools (Gubernatorial Directive to All School Boards and Superintendents – Continuity of Education Planning). Based on the March 17, 2020 directive from the Agency of Education, School Districts were required to keep all employees on payroll, whether they were working or not, through the remainder of the school year. That requirement expired on June 30, 2020.

In accordance with Addendum 6 to Executive Order 01-20, issued by the Governor of Vermont on March 24, 2020 (also referred to as the “Stay Home, Stay Safe Order”) and Directive 5 to Executive Order 01-20, issued by the Governor of Vermont on March 26, 2020, the Supervisory Union ceased in-house operations and moved to remote learning systems. The District chose to use zoom, google hangout and other such methods of remote learning to comply with the Governor’s order to support the continuity of learning. The application of this Executive Order necessitated that this method remained in force for the remainder of the scheduled school year.

Impact on Finances

The Supervisory Union does not currently anticipate any additional FY 2020 expenditures due to COVID-19 that would not be covered by existing resources including authorized Coronavirus, Aid, Relief and Economic Security (“CARES”) Act funding and applicable State programs.

Expected Federal/State Support

The Supervisory Union may have to take action to meet certain requirements to receive any additional Federal or State funding for budgetary or economic relief related to the challenges presented by COVID-19. However, the Supervisory Union expects that if those actions are necessary, that the Supervisory Union would qualify and satisfy the various conditions required to receive applicable Federal or State funds.

Conclusion

The ongoing effects of COVID-19, including the financial impact to the Supervisory Union, may change significantly as events and circumstances evolve locally, nationally and worldwide. At present it is not possible, with any degree of certainty, to estimate the impact of COVID-19 on the revenues, expenditures, budget or overall financial position of the Supervisory Union. No assurance can be given regarding future events or impacts because these actions and events are unpredictable or unknowable at this time and are outside the control of the Supervisory Union.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Implementation of New Accounting Standards

During the year ended June 30, 2020, the following statements of financial accounting standards issued by the Governmental Accounting Standards Board became effective:

Statement No. 95 "Postponement of the Effective Dates of Certain Authoritative Guidance." The primary objective of this Statement is to provide temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. That objective is accomplished by postponing the effective dates of certain provisions in Statements and Implementation Guides that first became effective or are scheduled to become effective for periods beginning after June 15, 2018 and later. (The following pronouncements exclude Statements No. 83 and No. 88 which were implemented prior to this Statement).

The effective dates of certain provisions contained in the following pronouncements are postponed by one year: Statement No. 84, Fiduciary Activities; Statement No. 89, Accounting for Interest Cost Incurred before the End of a Construction Period; Statement No. 90, Majority Equity Interests; Statement No. 91, Conduit Debt Obligations; Statement No. 92, Omnibus 2020; Statement No. 93, Replacement of Interbank Offered Rates; Implementation Guide No. 2017-3, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions (and Certain Issues Related to OPEB Plan Reporting); Implementation Guide No. 2018-1, Implementation Guidance Update-2018; Implementation Guide No. 2019-1, Implementation Guidance Update-2019 and Implementation Guide No. 2019-2, Fiduciary Activities. The effective dates of the following pronouncements are postponed by 18 months: Statement No. 87, Leases and Implementation Guide No. 2019-3, Leases.

Statement No. 97 "Certain Component Unit Criteria (paragraphs 4 & 5)." The primary objectives of paragraphs 4 & 5 in this Statement are to increase consistency and comparability related to the reporting of fiduciary component units in circumstances in which a potential component unit does not have a governing board and the primary government performs the duties that a governing board typically would perform. Management has determined the impact of this Statement is not material to the financial statements.

Government-Wide and Fund Financial Statements

The District's basic financial statements include both government-wide (reporting the District as a whole) and fund financial statements (reporting the District's major funds).

SOUTH BURLINGTON SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2020

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Both the government-wide and fund financial statements categorize primary activities as either governmental or business-type. The District's School Nutrition Funds, School's Out Program, Munson Field and other nonmajor funds are categorized as business-type activities. All other activities of the District are categorized as governmental.

In the government-wide Statement of Net Position, the governmental activities and business-type activities columns are (a) presented on a consolidated basis by column and (b) are reported on a full accrual, economic resources basis, which recognizes all long-term assets and receivables as well as long-term debt and obligations. The District's net position is reported in three parts - net investment in capital assets; restricted net position and unrestricted net position. The District first utilizes restricted resources to finance qualifying activities.

The government-wide Statement of Activities reports both the gross and net cost of each of the District's functions and business-type activities (instruction, operation and maintenance, etc.) excluding fiduciary activities. The functions are also supported by general government revenues (property taxes, certain intergovernmental revenues, miscellaneous revenues, etc.). The Statement of Activities reduces gross expenses (including depreciation) by related program revenues, operating and capital grants. Program revenues must be directly associated with the function or a business-type activity. Operating grants include operating-specific and discretionary (either operating or capital) grants while the capital grants column reflects capital-specific grants. For the most part, the interfund activity has been eliminated from these government-wide financial statements.

The net costs (by function) are normally covered by general revenue (taxes, certain intergovernmental revenues and charges for services, etc.).

The District does not allocate indirect costs. All costs are charged directly to the corresponding departments.

The government-wide focus is more on the sustainability of the District as an entity and the change in the District's net position resulting from the current year's activities.

Measurement Focus - Basic Financial Statements and Fund Financial Statements

The financial transactions of the District are reported in the individual funds in the fund financial statements. Each fund is accounted for by providing a separate set of self-balancing accounts that comprise its assets, deferred outflows of resources,

liabilities, deferred inflows of resources, fund balances, revenues and expenditures/expenses. The various funds are reported by generic classification within the financial statements.

The following fund types are used by the District:

1. Governmental Funds:

The focus of the governmental funds' measurement (in the fund statements) is upon determination of financial position (sources, uses and balances of financial resources) rather than upon net income. The following is a description of the governmental funds of the District:

Major funds:

- a. The General Fund is the general operating fund of the District. It is used to account for all financial resources except those required to be accounted for in another fund.
- b. The Capital Projects Fund is used to account for financial resources to be used for the acquisition or construction of various capital improvements in the District. Major sources of revenue are debt proceeds and transfers from the general fund.

Nonmajor funds:

- c. Special Revenue Funds are used to account for the proceeds of specific revenue sources that are legally restricted to expenditures for specified purposes.
- d. Capital Projects Funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities.

2. Proprietary Funds:

The focus of proprietary fund measurement is upon determination of operating income, changes in net position, financial position and cash flows. The generally accepted accounting principles applicable are those similar to businesses in the private sector. Operating revenues include charges for services, intergovernmental reimbursements and other miscellaneous fees which are a direct result of the

SOUTH BURLINGTON SCHOOL DISTRICT

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

proprietary activity. Non-operating revenues are any revenues which are generated outside of the general proprietary activity, i.e. interest income. The following is a description of the proprietary funds of the District:

Enterprise Funds are required to be used to account for operations for which a fee is charged to external users for goods or services and the activity (a) is financed with debt that is solely secured by a pledge of net revenues, (b) has third party requirements that the cost of providing services, including capital costs, be recovered with fees and charges or (c) established fees and charges based on a pricing policy designed to recover similar costs.

3. Fiduciary Funds:

Fiduciary funds are used to report assets held in a trustee or agency capacity for others and therefore are not available to support District programs. The reporting focus is on net position and changes in net position and is reported using accounting principles similar to proprietary funds. Component units that are fiduciary in nature have been excluded from these financial statements.

The District's fiduciary funds are presented in the fiduciary fund financial statements by type (agency and pension trust). Since by definition these assets are being held for the benefit of a third party (other local governments, private parties, etc.) and cannot be used to address activities or obligations of the government, these funds are not incorporated into the government-wide financial statements.

The emphasis in fund financial statements is on the major funds in either the governmental or business-type activities categories. Nonmajor funds by category are summarized into a single column, GASB Statement No. 34 sets forth minimum criteria (percentage of the assets, deferred outflows of resources, liabilities, deferred inflows of resources, revenues or expenses of either the fund category or the governmental and enterprise combined) for the determination of major funds. The nonmajor funds are combined in a column in the fund financial statements.

Basis of Accounting

Basis of accounting refers to when revenues and expenditures or expenses are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of the measurements made, regardless of the measurement focus applied.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

1. Accrual

Governmental activities in the government-wide financial statements and fiduciary fund financial statements are presented on the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when incurred.

2. Modified Accrual

The governmental fund financial statements are presented on the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recorded when susceptible to accrual; i.e., both measurable and available. "Available" means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. Expenditures are generally recognized under the modified accrual basis of accounting when the related liability is incurred. The exception to this general rule is that principal and interest on general obligation long-term debt, if any, is recognized when due.

Budget

The District's policy is to adopt an annual budget for operations. The budget is presented on the modified accrual basis of accounting which is consistent with generally accepted accounting principles.

In accordance with Governmental Accounting Standards Board Statement No. 24, *Accounting and Reporting for Certain Grants and Other Financial Assistance*, payments made by the State of Vermont to the Vermont State Retirement System for teachers and certain other school employees are reported as offsetting revenues and expenditures of the general fund.

Revenues per budgetary basis	\$ 50,577,217

The following procedures are followed in establishing budgetary data reflected in the financial statements:

1. In December, the Administration prepares a preliminary budget for review by the School Board of Directors.

2. After several public hearings, the School Board approves a budget for review by the voters forty-five days prior to election by the voters.
3. On the first Tuesday of March, the budget is adopted subject if it receives a majority of the votes cast.
4. If the budget fails, the City charter governs the process for a revote and subsequent adoption.

Deposits and Investments

The District's cash and cash equivalents are considered to be cash on hand demand deposits and short-term investments with original maturities of three months or less from the date of acquisition.

It is the District's policy to value investments at fair value. None of the District's investments are reported at amortized cost. For purposes of the statement of cash flows, all highly liquid investments with a maturity of three months or less when purchased are considered to be cash equivalents. The District Treasurer is authorized by State Statutes to invest all excess funds in the following:

- Obligations of the U.S. Government, its agencies and instrumentalities
- Certificates of deposits and other evidence of deposits at banks, savings and loan associations and credit unions
- Repurchase agreements
- Money market mutual funds

The South Burlington School District has no formal investment policy but instead follows the State of Vermont Statutes.

Receivables

Receivables include amounts due for capital projects, instruction and food service. All receivables are current and therefore due within one year. Receivables are reported net of an allowance for uncollectible accounts and revenues net of uncollectibles. Allowances are reported when accounts are proven to be uncollectible. The allowance for uncollectible accounts is estimated to be \$0 as of June 30, 2020. Accounts receivable netted with allowances for uncollectible accounts were \$2,166,889 for the year ended June 30, 2020.

Inventories

Inventories of supplies are considered to be expenditures at the time of purchase and are not included in the general fund balance sheet. The enterprise fund inventory consists of school nutrition supplies and food on hand at the end of the year, valued at cost. The cost value is determined using the first-in, first-out (FIFO) method.

Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in the government-wide financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

Interfund Receivables and Payables

Transactions between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as "due to/from other funds". While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Any residual balances outstanding between governmental activities and business-type activities are reported in the governmental-wide financial statements as "internal balances".

Transactions Between Funds

Legally authorized transfers are treated as interfund transfers and are included in the results of operations of both Governmental and Proprietary Funds.

Capital Assets

Capital assets purchased or acquired with a cumulative cost by class of \$5,000 or more are reported at historical cost or estimated historical cost. Contributed assets are reported at acquisition value as of the date received. Additions, improvements and other capital outlays that significantly extend the useful life of an asset are capitalized.

Other costs incurred for repairs and maintenance are expensed as incurred. Depreciation on all assets is provided on the straight-line basis over the following estimated useful lives. All retirements have been recorded by eliminating the net carrying values.

Estimated useful lives are as follows:

Buildings	20 - 50 years
Infrastructure	50 - 100 years
Machinery and equipment	3 - 50 years
Vehicles	3 - 25 years

Long-term Obligations

The accounting treatment of long-term obligations depends on whether the assets are used in governmental fund operations or proprietary fund operations and whether they are reported in the government-wide or fund financial statements.

All long-term obligations to be repaid from governmental and business-type resources are reported as liabilities in government-wide statements. The long-term obligations consist primarily of bonds payable, notes from direct borrowings payable, accrued compensated absences and net pension liability.

Long-term debt for governmental funds is not reported as liabilities in the fund financial statements. The debt proceeds are reported as other financing sources and payment of principal and interest reported as expenditures. The accounting for proprietary fund is the same in the fund statements as it is in the government-wide statements.

Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions and pension expense, information about the fiduciary net position of the Vermont State Teachers' Retirement System (VSTRS) Plan and the South Burlington School District Retirement Income Plan (DRI) and additions to/deductions from the VSTRS and the DRI Plans' fiduciary net position have been determined on the same basis as they are reported by the VSTRS and the DRI Plans. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

OPEB

For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, information about the fiduciary net position of the Vermont State Teachers' Retirement System (VSTRS). Additions

to/deductions from the VSTRS OPEB Plan's fiduciary net position have been determined on the same basis as they are reported by VSTRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms.

Deferred Outflows and Inflows of Resources

In addition to assets, the statement of financial position and/or balance sheet will at times report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The District has only one type of item, deferred outflows related to pensions. This item is reported in the statement of net position.

In addition to liabilities, the statement of financial position and or balance sheet will at times report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The School District has deferred inflows related to pensions qualifies for reporting in this category. This item is reported only in the statement of net position. All items in this category are deferred and recognized as an inflow of resources in the period that the amounts become available.

Net Position

Net position represents the difference between all other elements in a statement of financial position. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for those assets and adding back unspent proceeds. Net position is reported as restricted when there are limitations imposed on its use either through enabling legislations adopted by the District or through external restrictions imposed by creditors, grantors or laws or regulations of other governments. Unrestricted net position is the net amount of the assets, deferred outflows of resources, liabilities and deferred inflows of resources that are not included in the determination of net investment in capital assets or restricted net position.

Fund Balance

In the fund financial statements, fund balance for governmental funds is reported in classifications that comprise a hierarchy based primarily on the extent to which the

SOUTH BURLINGTON SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

District is bound to honor constraints on the specific purpose for which amounts in the funds can be spent. Fund balance is reported in five components - nonspendable, restricted, committed, assigned and unassigned.

Nonspendable - This includes amounts that cannot be spent either because they are not in spendable form or because they are legally or contractually required to be maintained intact.

Restricted - This includes amounts that can be spent only for specific purposes because of constitutional provisions or enabling legislation or because of constraints that are externally imposed by creditors, grantors, contributors or the laws or regulations of other governments.

Committed - This includes amounts that can be used only for specific purposes determined by a formal action of the inhabitants of the District. The inhabitants of the District through District meetings are the highest level of decision-making authority of the District. Commitments may be established, modified or rescinded only through a District meeting vote.

Assigned - This includes amounts that do not meet the criteria to be classified as restricted or committed but that are intended to be used for specific purposes. The authority for assigning fund balance is given through Vermont Statutes Annotated Title 16 §567 and is expressed by the School Board.

Unassigned - This includes all other spendable amounts. The general fund is the only fund that reports a positive unassigned fund balance amount. Other governmental funds besides the general fund can only report a negative unassigned fund balance amount.

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balances are available, the District considers restricted funds to have been spent first. When an expenditure is incurred for which committed, assigned or unassigned fund balances are available, the District considers amounts to have been spent first out of committed funds, then assigned funds and finally unassigned funds, as needed, unless the District meeting vote has provided otherwise in its commitment or assignment actions.

Program Revenues

Program revenues include all directly related income items applicable to a particular program (charges to customers or applicants for goods, services or privileges provided, operating or capital grants and contributions, including special assessments).

SOUTH BURLINGTON SCHOOL DISTRICT

Operating/Nonoperating Proprietary Fund Revenues

Operating revenues consist mainly of direct revenue sources and/or charges for services applicable to that fund's ongoing operations. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Encumbrance Accounting

Encumbrances are not liabilities and therefore, are not recorded as expenditures until receipt of material or service. For budgetary purposes, appropriations lapse at fiscal year-end. The District does utilize encumbrance accounting for any of its funds.

Use of Estimates

During the preparation of the District's financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosure of contingent items as of the date of the financial statements and the reported amounts of revenues and expenses/expenditures during the reporting period. Actual results may differ from these estimates.

NOTE 2 - DEPOSITS AND INVESTMENTS

Deposits:

The District's investment policies, which follow state statutes, authorize the District to invest in obligations of the U.S. Treasury, agencies and instrumentalities, other states and Canada, provided such securities are rated within the three highest grades by an approved rating service of the State of Vermont, corporate stocks and bonds within statutory limits, financial institutions, mutual funds and repurchase agreements. These investment policies apply to all District funds.

Custodial credit risk for deposits is the risk that, in the event of a failure of a depository financial institution, the District will not be able to recover its deposits or will not be able to recover collateral securities that are in possession of an outside party. The District does not have a policy covering custodial credit risk.

At June 30, 2020, the District's cash balance of \$3,660,657 which consisted of bank deposits and cash equivalents amounting to \$4,057,106 . Bank deposits are adjusted primarily by outstanding checks and deposits in transit to reconcile to the Supervisory Union's cash balance. Of this balance, \$250,000 was insured by federal depository insurance and consequently was not exposed to custodial credit risk. The remaining balance was collateralized with securities held by the financial institution in the District's name.

Custodial credit risk for investments is that, in the event of failure of the counterparty, the District will not be able to recover the value of its investments or collateral securities that are in possession of an outside party. Currently, the District does not have a policy for custodial credit risk for investments. The District's investments of \$12,094,278 were uninsured and uncollateralized.

Interest rate risk – is the risk that changes in interest rates will adversely affect the fair value of an investment. The District does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from fluctuations in interest rates.

At June 30, 2020, the District's investments were comprised of the following:

VERMONT STATE TEACHERS' RETIREMENT SYSTEM

Plan Description

All of the teachers employed by the District participate in the Vermont State Teachers' Retirement System ("VSTRS"), a cost-sharing multiple-employer defined benefit pension plan with a special funding situation, covering nearly all public day school and nonsectarian private high school teachers and administrators as well as teachers in schools and teacher training institutions within and supported by the State of Vermont that are controlled by the State Board of Education. Membership in the system for those covered classes is a condition of employment. During the year ended June 30, 2018 (the most recent period available), the retirement system consisted of 22,561 participating members.

The plan was established effective July 1, 1947 and is governed by *Title 16, V.S.A. Chapter 55*. Subsequent Vermont state legislation, *Act 74*, which became effective on July 1, 2010, contained numerous changes to the plan benefits available to current and future members, as well as a change in access to health care coverage after retirement, resulting from a multi-party agreement to provide sustainability of quality pension and retiree health benefits for Vermont teachers.

The general administration and responsibility for formulating administrative policy and procedures of the retirement System for its members and their beneficiaries is vested in the Board of Trustees consisting of six members. They are the Secretary of Education (ex-officio); the State Treasurer (ex-officio), the Commissioner of Financial Regulation (ex-officio); two members and one alternate elected by active members of the System under rules adopted by the Board; and one retired member and one alternate elected by the board of directors of Association of Retired Teachers of Vermont. The Chair is elected by the Board and acts as executive officer of the Board.

All assets are held in a single trust and are available to pay retirement benefits to all members. Benefits available to each group are based on average final compensation (AFC) and years of creditable service. The Vermont State Agency of Administration issues a publicly available Comprehensive Annual Financial Report (CAFR) that includes financial statements and required supplementary information for the VSTRS. That report may be viewed on the State's Department of Finance & Management website at: http://finance.vermont.gov/reports_and_publications/cafr.

The VSTRS provides retirement and disability benefits, annual cost-of-living adjustments, health care and death benefits to plan members and beneficiaries. There are two levels of contributions and benefits in the System: Group A - for public school teachers employed within the State of Vermont prior to July 1, 1981 and elected to remain in Group A; and Group C - for public school teachers employed within the State

of Vermont on or after July 1, 1990. Group C also includes those teachers hired prior to July 1, 1990 and were in Group B on July 1, 1990. When Act 74 became effective on June 30, 2010, Group C was further bifurcated into Groups #1 and #2. Group #1 contains members who were at least 57 years of age or had at least 25 years of service and Group #2 contains members who were less than 57 years of age and had less than 25 years of service.

Benefits available to each group are based on average final compensation (AFC) and years of creditable service and are summarized below:

Contributions

VSTRS is a cost-sharing public employee retirement system with one exception: all risks and costs are not shared by the School District but are the liability of the State of Vermont. VSTRS is funded through State and employee contributions and trust fund investment earnings; and the School District has no legal obligation for paying benefits. Required contributions to the System are made by the State of Vermont based upon a valuation report prepared by the System’s actuary, which varies by plan group. The Vermont State Teachers Retirement System estimates the contributions on behalf of the School District’s employees included in the teacher’s retirement plan which approximates \$4,566,656 or 19.15% of total payroll for employees covered under the plan.

Employee contribution rates by Plan group follow:

VSTRS	Group A	Group C – Group # 1	Group C – Group # 2
Employee Contributions	5.5% of gross salary; contributions stop after 25 years of creditable service	5.0% of gross salary with 5 or more years of service as of 7/1/14; 6.0% of gross salary if less than 5 years of service as of 7/1/14	5.0% of gross salary with 5 or more years of service as of 7/1/14; 6.0% of gross salary if less than 5 years of service as of 7/1/14

Employee contributions totaled \$1,239,556 during the year and were paid by the School District to the State of Vermont. The School District has no other liability under the plan. The School District’s total payroll for all employees covered under this plan was \$23,846,767 for the year ended June 30, 2020.

NOTE 17 - DEFINED BENEFIT PENSION PLANS (CONTINUED)

Pension Liabilities

The State is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of member employers. Therefore, these employers are considered to be in a special funding situation as defined in GASB No. 68 and the State is treated as a nonemployer to VSTRS. Since the District does not contribute directly to VSTRS, no net pension liability was recorded at June 30, 2020. The State's portion of the collective net pension liability that was associated with the District was as follows:

District's proportionate share of the net pension liability	\$ -
State's proportionate share of the net pension liability associated with the District	<u>50,895,637</u>
Total	<u><u>\$ 50,895,637</u></u>

The State of Vermont's proportionate share of the net pension liability associated with the District is equal to the collective net pension liability, actuarially measured as of June 30, 2019, multiplied by the District's proportionate share percentage. The District's proportionate share percentage was based on its reported salaries to the total reported salaries for all participating employers. At June 30, 2019, the District's proportion was 3.26123%, which was an increase of 0.05670% from its proportion measured as of June 30, 2018.

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended June 30, 2020, the District recognized total pension expense \$7,295,467 and revenue of \$7,295,467 for support provided by the State of Vermont for the VSTRS plan. At June 30, 2020, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

Significant Actuarial Assumptions and Methods

The total pension liability for the June 30, 2019 measurement date was determined by an actuarial valuation as of June 30, 2018 rolled forward to June 30, 2019 using the actuarial assumptions outlined below:

Investment Rate of Return: 7.50%, net of pension plan investment expenses, including inflation.

Inflation: 2.50% per year.

Salary Increases: Ranging from 3.75% to 9.09%

Deaths After Retirement: The VSTRS plan used 98% of the RP-2006 White Collar Employee with generational projection using Scale SSA-2018 for pre-retirement, 98% of the RP-2006 White Collar Annuitant with generational projection using Scale SSA-2018 for healthy retirees and the RP-2006 Disabled Mortality Table with generational projection using Scale SSA-2018 for disabled retirees.

Inactive Members: Valuation liability for the VSTRS plan equals 250.0% of accumulated contributions.

Future Administrative Expenses: No provisions were made, expenses of the System are paid by the State.

Unknown Data for Participants: For the VSTRS plan, it is the same as those exhibited by participants with similar known characteristics. If not specified, participants are assumed to be male.

Percent Married: 85% of male members and 35% of female members are assumed to be married.

Spouse's Age: Husbands are assumed to be three years older than their wives.

Cost-of-Living Adjustments: Adjustments for the VSTRS plan are assumed to occur on January 1 following one year of retirement. For the VSTRS plan this occurs at the rate of 2.55% per annum for Group A members and 1.40% per annum for Group C members (beginning at age 62 for Group C members who elect reduced early retirement). The January 1, 2020 COLA is assumed to be 1.60% for Group A and 1.00% for Group C.

Actuarial Cost Method: Uses the Entry Age Actuarial Cost Method. Entry age is the age at date of employment, or, if date is unknown, current age minus years of service. Normal Cost and Accrued Actuarial Liability are calculated on an individual basis and are allocated by salary, with Normal Cost determined using the plan of benefits applicable to each participant.

For the VSTRS plan, the *asset valuation method* used equals the preliminary asset value plus 20% of the difference between the market and preliminary asset values. The preliminary asset value is equal to the previous year's asset value (for valuation purposes) adjusted for contributions less benefit payments and expenses and expected investment income. If necessary, a further adjustment is made to ensure that the valuation assets are within 20% of the market value.

The *long-term expected rate of return* on the VSTRS plan investments was determined using a building-block method in which best-estimate ranges of expected

Discount Rate

The discount rate used to measure the total pension liability was 7.50% for the VSTRS plan. The projection of cash flows used to determine the discount rate assumed that contributions will continue to be made in accordance with the current funding policy which exceeds the actuarially determined contribution rate. Based on these assumptions, the fiduciary net position was projected to be available to make all projected future benefit payments to current System members. The assumed discount rate has been determined in accordance with the method prescribed by GASB 68.

DISTRICT RETIREMENT INCOME PLAN

Plan Description

The South Burlington School District Retirement Income Plan (the Plan) is a single-employer, noncontributory, defined benefit pension plan which provides retirement benefits to eligible employees of the District. The Plan is administered by the South Burlington Board of School Directors, made up of five elected members who provide the authority under which benefits provisions and the District’s obligation to contribute are established. The Plan is included as a pension trust fund in these basic financial statements.

Substantially all employees of the District (except professional educators) are members of the Plan. The plan calls for benefits to be paid to eligible employees at retirement based primarily upon years of service with the District and compensation

Contributions

The District's obligation to contribute is established and may be amended by the South Burlington Board of School Directors. The Board establishes employer contributions based on an actuarially determined contributions recommended by an independent actuary. The actuarially determined contribution is the estimated amount necessary to finance the costs of benefits earned by the plan members during the year, with an additional amount to finance a portion of any unfunded accrued liability. The calculation of the actuarially determined contribution is governed by the applicable provisions of the Retirement Code. The District contributed \$570,102 for the year ended June 30, 2020. The District's total payroll for the year ended June 30, 2020 for all employees covered under this plan was \$4,499,499.

Net Pension Liability, Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2020, the District reported a net pension liability of \$3,147,634 for the Plan. The net pension liability was measured as of September 30, 2019 and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date.

For the year ended June 30, 2020, the District recognized total pension expense of \$302,950. At June 30, 2020, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

Significant Actuarial Assumptions and Methods

The actuarial assumptions used in the June 30, 2020 valuation were based on the results of the most recent actuarial experience study, dated September 30, 2019.

The total pension liability for the September 30, 2019 measurement date was determined by an actuarial valuation as of October 1, 2019 using the actuarial assumptions outlined below:

Actuarial Cost Method: Entry Age Normal. The actuarial present value of the projected benefits of each individual is allocated on a level basis over the earnings or service of the individual between entry age and assumed exit age.

Actuarial valuation of the ongoing Plan involves estimates of the reported amounts and assumptions about probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality and future salary increases. Amounts determined regarding the net pension liability are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

Long-term Expected Rate of Return

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2020 are summarized in the following table:

Discount Rate

The discount rate used to measure the total pension liability was 6.5%. The projection of cash flows used to determine the discount rate assumed that contributions from the District will be made in accordance with past practice. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the Plan's net pension liability calculated using the discount rate of 6.5%, as well as what the Plan's net pension liability would be if it were calculated using a discount rate that is 1 percentage-point lower (5.5%) or 1 percentage-point higher (7.5%) than the current rate:

NOTE 18 - DEFINED CONTRIBUTION PLAN

Plan Description

The District offers its employees a defined contribution plan created in accordance with Internal Revenue Code Section 403. All eligible employees hired on or after September 11, 2013 may only enroll in the 403 plan upon the completion of one (1) year of employment. The plan is administered by Prudential.

Funding Policy

Plan provisions and contribution requirements are established and may be amended by the South Burlington Board of School Directors. Under the 403 plan, the District is required to contribute 4.0% of a participant's earnings for the plan year, with no required match from the participant, one time per year, after the end of the fiscal year and no later than September 30 of the next year. For the year ended June 30, 2020, the District's contribution to this plan was \$55,446.

Employees are immediately vested in their own contributions and earnings on those contributions and become vested in District contributions and earnings on District contributions after completion of 12 months of creditable service with the District. Non-vested District contributions are forfeited upon termination of employment. Such forfeitures are used to cover a portion of the pension plan's administrative expenses. There were no forfeitures of non-vested contributions for the year ended June 30, 2020, forfeitures.

It is the opinion of the District's management that the District has no liability for losses under the plan but does have the duty of due care that would be required of an ordinary prudent investor.

Funding Policy

For all support staff, employee contributions are matched up to 2% by the District. For central office administrators, the District makes a contribution of \$3,000, for the superintendent the contribution is \$5,000 to the employee's individual 403(b) accounts. There is no matching amount paid by the District for teachers and building administrators. For the year ended June 30, 2020, employee contributions totaled \$437,796 and the District recognized pension expense of \$107,180.

457 DEFERRED REVENUE SAVINGS PLAN

Plan Description

The District offers its employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan, available to all employees, permits the employee to defer a portion of salary until future years. There is no employer match by the District. The deferred compensation is not available to employees until termination, retirement, death or unforeseen emergency. All employees are allowed to contribute up to the maximum allowed by law on a pre-tax basis.

The District has contracted with Empower Retirement to administer the plan. Employee contributions are withheld by the District and remitted regularly to Empower Retirement which applies the funds to accounts as directed by employees.

All amounts of compensation deferred under the plan, all property and rights purchased with those amounts and all income attributable to those amounts, property or rights are (until paid or made available to the employee or other beneficiary) to be held in a trust for the exclusive benefit of the participants and their beneficiaries.

NOTE 20 - OTHER POST EMPLOYMENT BENEFIT (OPEB) PLAN

VERMONT STATE TEACHERS' RETIREMENT SYSTEM

Plan Description

The Vermont State Teachers' Retirement System provides postemployment benefits to eligible VSTRS employees who retire from the System through a cost-sharing, multiple-employer postemployment benefit (OPEB) plan (the Plan).

The plan covers nearly all public day school and nonsectarian private high school teachers and administrators as well as teachers in schools and teacher training institutions within and supported by the State that are controlled by the State Board of Education. Membership in the system for those covered classes is a condition of employment. During the year ended June 30, 2019, the Plan consisted of 184 participating employers and at June 30, 2018 (the most recent period available), the plan consisted of 6,713 retired members or beneficiaries currently receiving benefits and 9,892 active members.

Vermont Statute Title 16 Chapter 55 assigns the authority to VSTRS to establish and amend the benefits provisions of the Plan and to establish maximum obligations of the Plan members to contribute to the Plan. Management of the Plan is vested in the Vermont State Teachers' Retirement System Board of Trustees, which consists of the Secretary of Education (ex-officio); the State Treasurer (ex-officio); the Commissioner of Financial Regulation (ex-officio); two trustees and one alternate who are members of the system (each elected by the system under rules adopted by the Board) and one trustee and one alternate who are retired members of the system receiving retirement benefits (who are elected by the Association of Retired Teachers of Vermont).

All assets of the Plan are held in a single trust and are available to pay OPEB benefits to all members. The Vermont State Agency of Administration issues a publicly available Comprehensive Annual Financial Report (CAFR) that includes financial statements and required supplementary information for the VSTRS. That report may be viewed on the State's Department of Finance and Management website at: http://finance.vermont.gov/reports_and_publications/cafr.

the same VSTRS subsidy for the spouse’s lifetime. If the retiree elects the joint and survivor pension option but not the Premium Reduction Option, spouses are covered for the spouse’s lifetime but pay 100% of the plan premium after the retiree’s death.

Retirees pay full cost of dental benefits.

OPEB Liabilities

The State is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of member employers. Therefore, these employers are considered to be in a special funding situation as defined in GASB No. 75 and the State is treated as a nonemployer to VSTRS. Since the School District does not contribute directly to VSTRS, no net OPEB liability was recorded at June 30, 2020. The State’s portion of the collective net OPEB liability that was associated with the School District was as follows:

District's proportionate share of the net OPEB liability	\$	-
State's proportionate share of the net OPEB liability associated with the District		26,345,209
Total	\$	26,345,209

The State of Vermont’s proportionate share of the net OPEB liability associated with the School District is equal to the collective net OPEB liability, actuarially measured as of June 30, 2019, multiplied by the School District’s proportionate share percentage. The School District’s proportionate share percentage was based on its reported salaries to the total reported salaries for all participating employers. At June 30, 2019, the School District’s proportion was 2.53136% which was a decrease of 0.00575% from its proportion measured as of June 30, 2018.

OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

For the year ended June 30, 2020, the School District recognized total OPEB expense of \$1,358,372 and revenue of \$1,358,372 for support provided by the State of Vermont for the Plan. At June 30, 2020, the School District reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

Discount Rate

The discount rate is the single rate of return, that when applied to all projected benefit payments, results in an actuarial present value that is the sum of the actuarial present value of projected benefit payments projected to be funded by plan assets using a long term rate of return and the actuarial present value of projected benefit payments that are not included in (1) using a yield or index rate for 20 year tax exempt general obligation municipal bonds with an average rating of AA/Aa or higher. Healthcare Trend Rate

Health care trend measures the anticipated overall rate at which health plan costs are expected to increase in future years. The trend rate assumptions were developed using Segal's internal guidelines, which are established each year using data sources such as the 2019 Segal Health Trend Survey, internal client results, trends from other published surveys prepared by the S&P Dow Jones Indices, consulting firms and brokers and CPI statistics published by the Bureau of Labor Statistics. The sensitivity of net OPEB liability to changes in healthcare trend rates are as follows:

	1% Decrease	Healthcare Trend Rates	1% Increase
District's proportionate share of the net OPEB liability	\$ -	\$ -	\$ -

Actuarial Methods and Assumptions

The total OPEB liability for the Plan was determined by an actuarial valuation as of June 30, 2019, using the following methods and assumptions applied to all periods included in the measurement:

Actuarial Cost Method

The Entry Age Normal Actuarial Cost Method is used to determine costs. Under this funding method, a normal cost rate is determined as a level percent of pay for each active Plan member and then summed to produce the total normal cost for this Plan. The unfunded actuarial liability is the difference between the actuarial liability and the actuarial value of assets.

Amortization

The total OPEB liability of this Plan is amortized on an open 30-year period. The amortization method is a level dollar amortization method.

Asset Valuation Method

The Asset Valuation Method used is market value as of the measurement date.

The long-term expected rate of return on OPEB plan investments are developed for each major asset class. These returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target allocation, long-term expected rates of return for each major asset class and expected inflation, as of June 30, 2019, are summarized below:

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Large cap equity	20.00%	7.50%

Assumptions

The actuarial assumptions used to calculate the actuarially determined contribution rates can be found in the Report on the Actuarial Valuation of Post-Retirement Benefits of the Vermont State Teachers' Retirement System Prepared as of June 30, 2016 completed by Buck Consulting. As of June 30, 2019, they are as follows:

Changes in Net OPEB Liability

Changes in net OPEB liability are recognized in OPEB expense for the year ended June 30, 2019 with the following exceptions:

Changes in Assumptions

Differences due to changes in assumptions about future economic, demographic or claim and expense factors or other inputs are recognized in OPEB expense using a straight-line amortization method over a closed period equal to the average expected remaining service lives of active and inactive members in each plan. The first year is recognized as OPEB expense and the remaining years are shown as either deferred outflows of resources or deferred inflows of resources. The amortization period remaining was twenty-nine years as of July 1, 2019. For the fiscal year ended June 30, 2019, the discount rate was decreased from 3.87% to 3.50%.

OPEB Plan Fiduciary Net Position

The schedule of employer allocations and schedule of OPEB amounts by employer are prepared on the accrual basis of accounting in accordance with U.S. generally accepted accounting principles. The schedules present amounts that are elements of the financial statements of VSTRS or their participating employers. VSTRS does not issue stand-alone financial reports, but instead are included as part of the State of Vermont's Comprehensive Annual Financial Report (CAFR). Annual money-weighted rate of return, net of investment expense	3.16%	5.92%	11.42%	9.60%	-1.68%	10.04%

Notes to schedule:

The money-weighted rate of return considers the changing amounts actually invested during a period and weights the amount of pension plan investments by the proportion of the time they are available to earn a return during that period. The rate of return is then calculated by solving, through an iterative process, for the rate that equates the sum of the weighted external cash flows into and out of the pension plan investments to the ending fair value of pension plan investments.

* The amounts presented for each fiscal year were determined as of September 30 and are for those years for which information is available.

NOTES TO SCHEDULE OF EXPEDITURES OF FEDERAL AWARDS JUNE 30, 2020

1. Basis of Presentation

The accompanying schedule of expenditures of federal awards (the Schedule) includes the federal award activity of the South Burlington School District under programs of the federal government for the year ended June 30, 2020. The information in this Schedule is presented in accordance with the requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards* (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of the South Burlington School District, it is not intended to and does not present the financial position, changes in net position or cash flows of the South Burlington School District.

2. Summary of Significant Accounting Policies

- a. Expenditures reported on the Schedule are reported on the accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance and/or OMB Circular A-87, *Cost Principles for State, Local and Indian Tribal Governments*, wherein certain types of expenditures are not allowable or are limited as to reimbursement.
- b. South Burlington School District has not elected to use the 10 percent *de minimis* indirect cost rate as allowed under the Uniform Guidance.

3. Noncash Awards

The South Burlington School District reports U.S. Department of Agriculture (USDA) Foods consumed on the Schedule at the fair value [or entitlement value]. The State of Vermont allocated USDA Foods to the respective program(s) that benefitted from the use of those USDA Foods.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN
ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Board of Directors
South Burlington School District
South Burlington, Vermont

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, business-type activities, each major fund and the aggregate remaining fund information of the South Burlington School District as of and for the year ended June 30, 2020 and the related notes to the financial statements, which collectively comprise the South Burlington School District's basic financial statements and have issued our report thereon dated May 27, 2021.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the South Burlington School District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the South Burlington School District's internal control. Accordingly, we do not express an opinion on the effectiveness of the South Burlington School District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A *significant deficiency* is a deficiency or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

www.rhrsmith.com

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the South Burlington School District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and accordingly, we do not express such an opinion.

The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*. We noted certain other matters that we reported to management of the South Burlington School District in a separate letter dated May 27, 2021.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE FOR EACH MAJOR
PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE
REQUIRED BY UNIFORM GUIDANCE

Board of Directors
South Burlington School District
South Burlington, Vermont

Report on Compliance for Each Major Federal Program

We have audited South Burlington School District's compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of South Burlington School District's major federal programs for the year ended June 30, 2020. South Burlington School District's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the federal statutes, regulations and the terms and conditions of its federal awards applicable to its federal programs.

Auditors' Responsibility

Our responsibility is to express an opinion on compliance for each of South Burlington School District's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about South Burlington School District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

Tel: (800) 300-7708 (207) 929-4606 Fax: (207) 929-4609
www.rhrsmith.com

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of South Burlington School District's compliance.

Opinion on Each Major Federal Program

In our opinion, South Burlington School District complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2020.

Report on Internal Control Over Compliance

Management of South Burlington School District is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered South Burlington School District's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of South Burlington School District's internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of South Burlington School District's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. *A material weakness in internal control over compliance* is a deficiency or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected and corrected, on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this communication is not suitable for any other purpose.
